- **Accounting & Finance Function Overview**
- Lab:
 - Case 1. General Ledger Case
- Conclusion and look ahead

Accounting & Finance Function

Alteryx SparkEd Cases:

- Five cases
- Three Classes
- One Challenge

Welcome!

Class Agenda

- Accounting & Finance Function Overview
- **Lab:**
 - **Case 1. General Ledger Case**
- Conclusion and look ahead

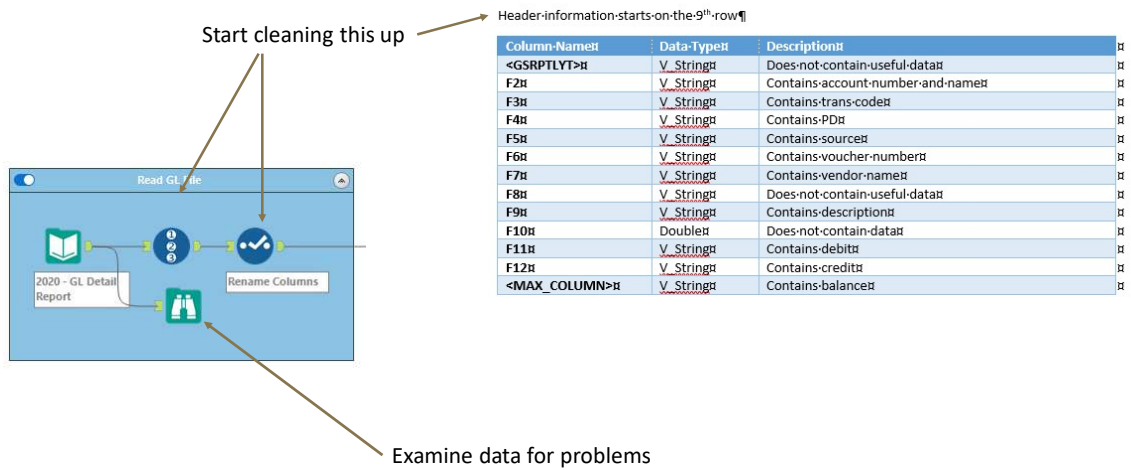

Cleaning up the GL Case

Involved ETL case in three steps:

- **Read in the GL file:** We will then examine the data to identify problems.
- **Extract/fill missing data:** some new tools, some old tools.
- **Clean and output the file:** including correcting field types.

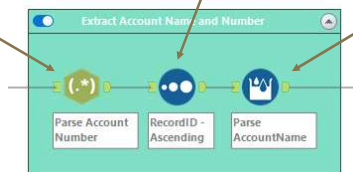

Case 1 Challenge Levels

1. Completed Workflow
2. Hints and Tools
3. No Hints
4. Dynamic header solution

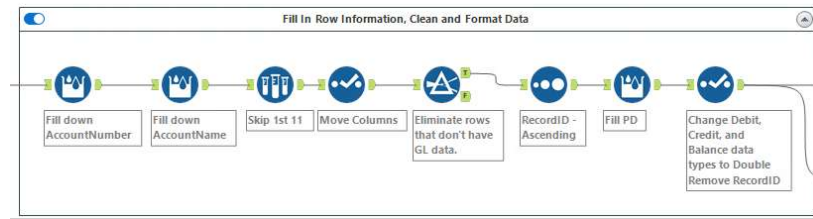

Regex

Sort data and use a *new* tool: multi-row formula

Complete the ETL process:

Output the data to excel:

Conclusion and look-ahead

Accounting and Finance Function:

- Some data analytics tasks are good candidates for automated workflows:
 - Repeatable using the same workflow.
 - Tasks that are encountered frequently (e.g., monthly).
- This approach is a modern alternative to a manual skill!
 - Saves time and reduces errors relative to a manual approach.

Conclusion and look-ahead

Next 3 classes:

- Accounting and finance function analytics parts 2 and 3 using Alteryx (2 classes / 4 cases).
- Alteryx Escape Room Challenge.

Thank you!
